To access your digital copy of the SE Handbook v4
Click on *Go back to Profile Home*

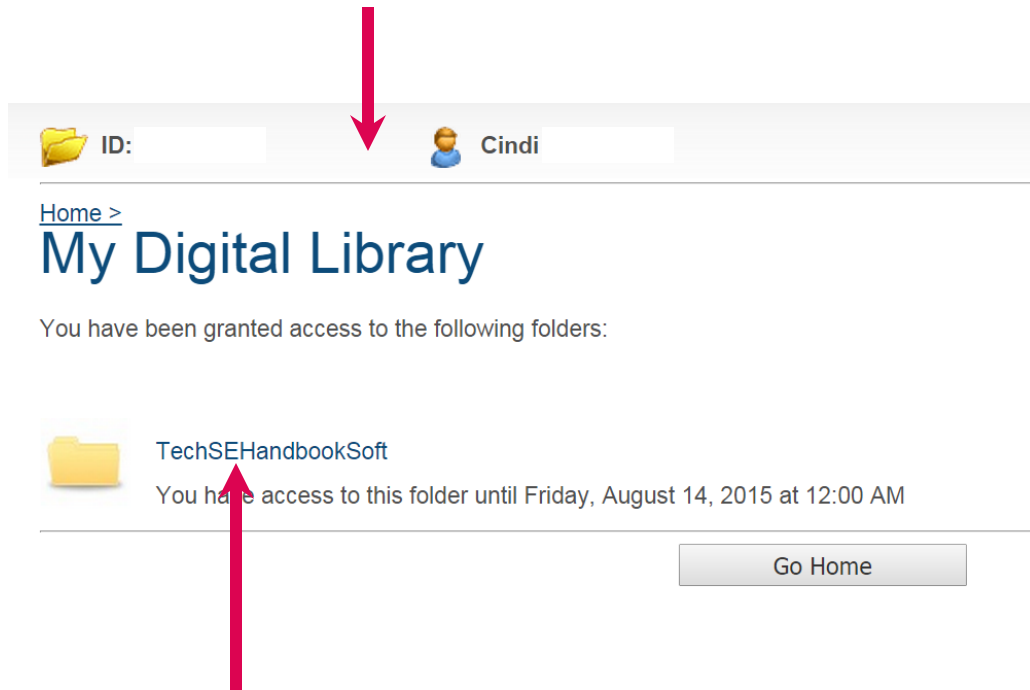

The screenshot shows the INCOSE website's user profile page. At the top, the INCOSE logo is on the left, and navigation links (INCOSE CONNECT, INCOSE Store, Join or Renew, Contact Us) are on the right. Below the logo is a horizontal menu with tabs: Products & Publications, Certification, Chapters & Groups, News & Events, About System Engineering, and About INCOSE. Under this menu are two buttons: Profile Home and INCOSE Online Store. The main content area is titled 'Welcome to International Council on Systems Engineering' and includes the user's ID (235102) and name (Cindi M. Royce). It is divided into three sections: 'My Profile' (containing customer ID, name, contact info, and links to edit information or change password), 'My Account' (showing balance and payment history), and 'Donations' (showing no records found). A red arrow points to the 'My Digital Library' link in the 'My Profile' section, which is described as the location for digital purchases.

My Digital Library* shows up on your profile page under the section *My Profile

TechSEHandbookSoft

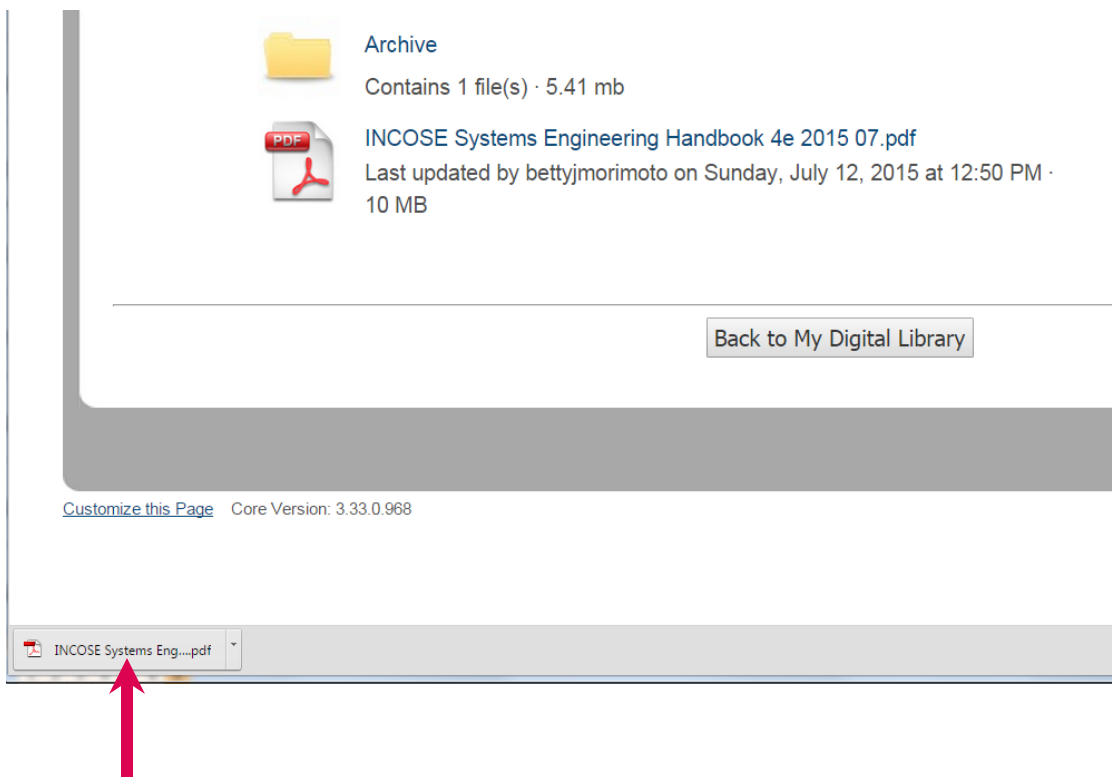

The objective of the INCOSE Systems Engineering Handbook (SEH) is to describe key process activities performed by systems engineers. The intended audience is the systems engineering (SE) professional. When the term systemscengineer is used in this handbook, it includes the new systemscengineer, a product engineer or an engineer in another discipline who needs to perform SE, or an experienced systems engineer who needs a convenient reference. Editors: David D. Walden, ESEP, Garry J. Roedler, ESEP, Kevin J. Forsberg, ESEP, R. Douglas Hamelin, Thomas M. Shortell, CSEP.
